A STORY OF RATIOS Lesson 1 6 • 4

### Lesson 1: The Relationship of Addition and Subtraction

#### Classwork

#### **Opening Exercise**

a. Draw a tape diagram to represent the following expression: 5 + 4.

b. Write an expression for each tape diagram.

#### **Exercises**

1. Predict what will happen when a tape diagram has a large number of squares, some squares are removed, and then the same amount of squares are added back on.

- 2. Build a tape diagram with 10 squares.
  - a. Remove six squares. Write an expression to represent the tape diagram.
  - b. Add six squares onto the tape diagram. Alter the original expression to represent the current tape diagram.

- c. Evaluate the expression.
- 3. Write an equation, using variables, to represent the identities we demonstrated with tape diagrams.
- 4. Using your knowledge of identities, fill in each of the blanks.

a. 
$$4 + 5 - \underline{\phantom{0}} = 4$$

b. 
$$25 - \underline{\hspace{1cm}} + 10 = 25$$

c. 
$$\underline{\phantom{0}} + 16 - 16 = 45$$

d. 
$$56 - 20 + 20 =$$

5. Using your knowledge of identities, fill in each of the blanks.

a. 
$$a + b - \underline{\hspace{1cm}} = a$$

b. 
$$c - d + d = ____$$

c. 
$$e + _{---} - f = e$$

d. \_\_\_\_\_ 
$$-h + h = g$$

#### **Problem Set**

- 1. Fill in each blank.
  - a.  $\underline{\phantom{0}} + 15 15 = 21$
  - b. 450 230 + 230 =
  - c.  $1289 \underline{\phantom{0}} + 856 = 1289$
- 2. Why are the equations w x + x = w and w + x x = w called *identities*?
